Unit Testing

Further information

From the basics:

- Proficient in OOP and design patterns, trying to write clean code.
- I know basic algorithms and understand basic data structures.
- Knowledge of Git
- Can build a multi-layer architecture (DDD)
- I use preprocessors (SCSS)
- JavaScript (ES6+)
- TypeScript
- Can work in Figma
- I know on a basic level what Docker is.
- I know how CI/CD works (I've used GitHub Actions for my projects).
- Experienced with templating tools (Pug, handlebars).

Have experience with large projects.

As a front-end developer:

- Mainly use Vue 2 (Vuex, Vue router)
- Started to learn React (hooks, styled components, next)
- Covering my Unit code with tests (Jest).
- Had experience with Three.js
- axios

As a backend developer:

- Knowledge of REST.
- ASP.NET Core (Web API)
- Entity Framework
- Have basic knowledge of SQL
- Experienced with NoSQL (mongoDB).
- Nest.js (had experience with creating microservices)

I am a passionate developer, who likes to create nice-looking and convenient applications and to think about their architecture. I try to write clean, testable and maintainable code. I also have good teamwork skills - it's easy for me to communicate with other people to build a marvelous product. I want to become a better developer by solving interesting tasks and working in a cool team.
